

AHMAD MUJTABA

Lahore, PK | +92 345 7139062 | ahmadmujtaba2312@gmail.com | [GitHub](#) | [LinkedIn](#) | [Ahmad Mujtaba](#)

WORK EXPERIENCE

MetisCore (AI Based Solutions)

Remote - Lahore
July 2025 – June 2026

Software Developer

- Contributed to development of application workflows and backend systems using Express.js and Next.js
- Worked with API integrations and validated data exchange between services
- Analyzed logs and debugged system behavior in AI-enabled environments
- Assisted in development of warehouse management system

Lucidbee (Marketing Agency)

Remote - Lahore
July 2024 – June 2025

Full Stack Developer

- Developed and deployed multiple client websites using React.js, Express.js and Next.js
- Built scalable frontend interfaces and integrated backend APIs for dynamic functionality
- Delivered production ready solutions for clients including MetisCore
- Collaborated with clients to gather requirements and implement custom features
- Ensured performance, responsiveness, and cross-device compatibility
- Developed and deployed cross-platform mobile interfaces using React Native, ensuring responsive and native-like user experiences
- Integrated REST APIs and backend services for dynamic mobile functionality

VintaFix Solutions (Marketing Agency)

Remote - Lahore
July 2025 – November 2025

Software Developer

- Developed and validated AI enhanced e-commerce application including chatbot assisted workflows
- Integrated REST APIs for frontend-backend communication and ensured reliable data flow
- Evaluated LLM responses for consistency, accuracy, and edge case scenarios
- Verified end-to-end workflows including checkout systems and AI assisted interactions

ASHTech (Automation B2B Startup)

Remote - Lahore
Nov 2023 – Feb 2024

Software Developer (Backend & Web)

- Built and structured company website ensuring responsiveness and usability
- Developed backend logic and validated system workflows before deployment
- Collaborated with team to debug and improve system performance
- Designed brand assets contributing to product presentation and identity

PROJECT EXPERIENCE

AI Data Analytics Assistant (Python + React + FastAPI)

- Built a production-ready AI-powered analytics platform for uploading, cleaning, and querying datasets using natural language
- Developed a React + TypeScript frontend and FastAPI backend with JWT authentication and per-user dataset isolation
- Designed a Celery async task queue with Upstash Redis for processing large CSV files (up to 5GB) without blocking the API
- Built an automated cleaning pipeline handling missing values, date standardisation, data type inference, and global deduplication, reducing manual data prep time by 98%
- Integrated LangChain with self-hosted Ollama (Qwen3) for SQL generation from natural language questions

- Implemented embedding-based column selection for datasets with 500+ columns to avoid LLM context overflow
- Added SQL validation using SQLGlot, cost estimation via EXPLAIN, and a retry loop for error correction
- Containerized with Docker and deployed CI/CD pipeline (GitHub Actions) across free cloud tiers: Render, Supabase, Upstash, Cloudflare R2, and Oracle Cloud
- Added structured logging and monitoring with Grafana Cloud

AI-Powered Expense Tracker (React Native + Expo + TypeScript)

- Built a cross-platform mobile app using React Native, Expo, and TypeScript
- Integrated OpenAI Vision API for receipt scanning and automated expense categorization
- Implemented SQLite for offline storage and real-time expense tracking
- Designed intuitive navigation with React Navigation (Stack + Bottom Tabs)
- Created interactive charts for spending breakdowns and monthly trends
- Managed state using Context API and optimized performance for smooth UX

Warehouse Management App (Express JS + MySQL + Figma)

- Developed backend APIs and implemented CRUD operations
- Designed workflows for inventory management and role based access
- Ensured database integrity using SQL validation

Server-Client Cloud System (C#)

- Built client-server architecture with structured communication protocols
- Implemented error handling and validated data transmission accuracy
- Simulated failure scenarios to test system robustness
- Analyzed logs to debug runtime exceptions

TECHNICAL SKILLS

AI & Intelligent Systems

RAG Based Applications, Prompt Engineering, LLM Integration, AI Output Evaluation, Edge Case Handling, OpenAI Vision API

Full Stack Development

React.js, [Express.js](#), [Next.js](#), TypeScript, Supabase, REST APIs, Frontend-Backend Integration, Responsive UI Development, React Navigation, SQLite

Backend & Software Engineering

Python, C++, C#, FastAPI, Client-Server Architecture, JSON Data Handling

AI Automation & Data Processing

Data Cleaning Automation, Workflow Design, Data Validation, SQL (MySQL), Data Flow Analysis

Tools

Postman, MySQL, Git, Figma

EDUCATION

Bachelors in Computer Science

Information Technology University, Lahore

Onsite

Expected May 2026

Key coursework

Artificial Intelligence, Machine Learning, Deep Learning, Data Analysis, Image Processing, Artificial Neural Network, Database Systems, Computer Networks, Data Structures & Algorithms, Software Engineering

ADDITIONAL SKILLS

Core Competencies

RAG Systems, API Integration, Backend Development, AI System Evaluation, Prompt Optimization, MySQL, Software Engineering, Data Analysis, Fine-Tuning, Model Training, Flutter, Project Management, Software Engineering, Graphic Designing, Website Development, Competitor Research, Statistical Analysis, Probability Analysis, Microsoft Office, UI/UX
